Manitou Springs' Climate Protection Campaign

Commonwheel Proposes a Zero Waste Labor Day Festival

According to the U.S. Environmental Protection Agency, the Meeting and Event Industry represents the second most wasteful industry in the U.S. Waste from events is rarely recycled. It is deposited in landfills and ends up generating lots of CO₂, Methane and other chemical emissions, which pollute our land and atmosphere. In order to cease this wasteful cycle the Commonwheel Artists of Manitou Springs is developing a plan to sponsor a ZERO WASTE Festival and NEEDS YOUR HELP. Visit the Climate Protection Campaign Booth to sign up to volunteer and learn more about Commonwheel's efforts.

To volunteer to assist with this goal over Labor Day Weekend, 2009 please email Festival@commonwheel.com.
